EXPERIENCE

Jason Aspin's work focuses on the investigation, design development, and construction observation of roofing, waterproofing, and concrete repair projects. He has experience with several roofing systems, including built-up, modified bitumen, and single-ply membrane systems, as well as shingle, tile, and sheet metal. Mr. Aspin also has experience with plaza and below-grade waterproofing systems.

Mr. Aspin has participated in projects involving the investigation and repair of historic concrete structures, including high-rises, monuments, and plazas. He has also prepared construction documents for the restoration of historic landmarks and steel trusses.

REPRESENTATIVE PROJECTS

Roofing and Waterproofing

- Blackstone Hotel - Chicago, IL: Sheet metal roofing replacement and vaulted sidewalk repairs
- Joliet Junior College - Joliet, IL: Comprehensive roofing condition survey of buildings on the entire campus
