EXPERIENCE

Warren Bonisch is a nationally known expert in fire protection engineering, including fire and life safety analysis, egress design, performance-based design and analysis, code consultation, fire protection design and analysis and related services for a wide range of structures and projects. His experience has included participation in numerous design and consulting projects, leading project teams and managing projects. Mr. Bonisch is also recognized for his development of innovative solutions to code compliance issues. His experience includes both existing and new projects, nationwide and globally.

Prior to joining WJE, Mr. Bonisch was vice president at Jensen Hughes, where he led project teams in various large-scale projects nationwide. His experience spans thirty-four years in fire protection engineering, management, and operations—including thirty-one years with Schirmer Engineering/Aon Fire Protection Engineering, where he served in various roles, including senior vice president of the southwestern United States.
