

Wiss, Janney, Elstner Associates, Inc.
Solutions for the Built World

WJE is pleased to announce the addition of

Andrew S. Weber

to the San Francisco branch as an Associate Principal.

Mr. Weber has over twenty-four years of experience in architectural design, project management, construction administration, and historic preservation services. His portfolio includes work with hospitality, retail, office, residential, and museum structures.

Specializing in the renovation and adaptive reuse of existing and historic buildings, Mr. Weber has performed a variety of services including project conception, financing with historic tax credits, and LEED certification. His design for a project in Milwaukee recently received the Mayor's Design Award, which recognizes excellence in urban design. The award-winning project included renovation, adaptive reuse, and historic restoration services for a light manufacturing building. Converted into a mixed-use retail and office facility without disrupting its historical significance, the building achieved LEED Gold certification.

Mr. Weber will continue to concentrate on all aspects of construction troubleshooting, design-build for repair and renovation, architectural investigations, peer review, historic preservation, and facade assessments.
