EXPERIENCE

Harry Hunderman specializes in the application of technology to the conservation of the built environment. He has special expertise in repair and rehabilitation of existing, new, and historic buildings. As former manager of WJE's architecture group, Mr. Hunderman was involved in a wide variety of technical issues related to the building envelope, ranging from roofing and waterproofing to performance testing of facade components.

Mr. Hunderman has led multidisciplinary teams to provide problem-solving investigation and design services for the repair and rehabilitation of some of the nation's most notable historic buildings and monuments, including both older and modern landmarks. He has published and lectured extensively on preservation technology and has chaired several conferences and symposia on preservation issues.

REPRESENTATIVE PROJECTS

Facade Assessment

- Kennedy Center for the Performing Arts - Washington, D.C.: Leader of a multidisciplinary team in a multiyear effort for the comprehensive renovation, including restoration of exterior envelope, upgrading of building systems, and modifications to the interior

Historic Preservation
