

WJE SAN FRANCISCO

Solutions for the Built World

Founded more than half a century ago, Wiss, Janney, Elstner Associates, Inc. (WJE) is an interdisciplinary engineering, architecture, and materials science firm specializing in the development of practical, innovative, and technically sound solutions across all areas of new and existing construction. The San Francisco office was established in 1978 as WJE's first branch office, serving the San Francisco Bay Area and the West Coast.

OUR SERVICES

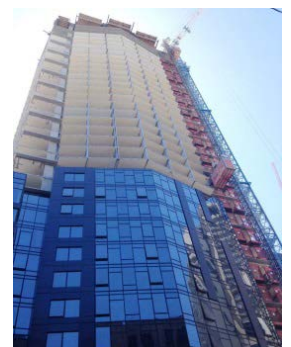

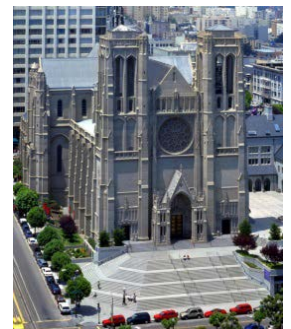

- Structural engineering
- Architecture and architectural engineering
- Materials science
- Testing
- Design
- Geotechnical and geological engineering
- Litigation consulting

OUR PEOPLE

The San Francisco office has more than fifty employees, including nineteen licensed senior-level architects and engineers who specialize in the firm's primary practice areas, incorporating the experience gained from more than 3,000 projects performed from the San Francisco office. Our architects and engineers have advanced the engineering and architecture fields working on numerous technical committees, authoring more than 200 technical papers, and contributing to more than twenty construction-industry organizations.

OUR RESOURCES

Our in-house expertise is backed by added sources throughout the company via our technical resource groups that are specifically designed to tap into the company's wide base of knowledge. San Francisco's engineers and architects are also supported by technicians who are, themselves, experts in testing and instrumentation. With more than 600 employees nationwide, WJE has the resources to respond to virtually any problem, with expertise in all aspects of construction technology.
