Kimball Beasley, PE, Elected as Fellow of the American Society of Civil Engineers

NORTHBROOK, IL (December 7, 2009) — Kimball Beasley of WJE's Princeton office was recently elected as a fellow of the American Society of Civil Engineers (ASCE). ASCE fellows are legally registered professional engineers or land surveyors who have made significant technical or professional contributions and have demonstrated notable achievement in responsible charge of engineering activity for at least ten years following election to the ASCE grade of member. Fellows occupy the Society's second-highest membership grade, exceeded only by distinguished members.

Mr. Beasley has extensive experience in investigation and repair design for both historic and contemporary buildings. Since joining WJE in 1973, he has investigated more than 1,500 failures and performance problems involving a wide variety of building components and materials, including serviceability and stability failures for building wall systems and structural elements.

About WJE

WJE is an interdisciplinary firm of architects, structural engineers, and materials scientists that specializes in the investigation, analysis, testing, and design of repairs for historic and contemporary structures. WJE focuses on delivering practical, innovative, and technically sound solutions across all areas of construction technology. Since the firm's founding more than fifty years ago, WJE specialists have brought the collective experience gained from conducting more than seventy-five thousand investigations worldwide to every construction challenge. WJE combines state-of-the-art laboratory and testing facilities, nationwide offices, and knowledge-sharing systems to provide solutions for the built world. For more information, please visit wje.com.
