

FacadeOrdinance.com Relunched by Wiss, Janney,
Elstner Associates, Inc. (WJE)

A Comprehensive and Valuable Internet Resource for Industry Professionals

NORTHBROOK, IL (May 11, 2009) — WJE is pleased to announce the newly redesigned FacadeOrdinance.com, an informational web site with general information about city facade ordinances throughout the United States. With newly enhanced graphics and updated content, FacadeOrdinance.com is designed to accommodate the needs of building owners, engineers, architects, and general contractors searching for valuable information from a reliable source.

“We are very pleased with the new design and functionality of the website,” said Executive Vice President and Senior Principal Gary Klein. “We know it will better serve the needs of industry professionals and we hope those within the profession continue to use it on a consistent basis,” he said.

The site provides a general overview of selected facade ordinances, including such information as year enacted, ordinance number, and administrative authority contact information. The site also provides the types of buildings that are required to undergo facade inspections and ordinance-specified inspection time frames. Individual web pages within FacadeOrdinance.com contain information pertaining to types of individual city inspection ordinances with links to various government web sites as well as other pertinent information.

A facade ordinance is a law passed by local authorities requiring the periodic inspection of certain building facades to help ensure public safety. Currently, the cities of Boston, Chicago, Columbus, Detroit, Milwaukee, New York, Pittsburgh, and St. Louis all have ordinances that require periodic facade inspection.

About WJE

Wiss, Janney, Elstner Associates, Inc., (WJE) is an interdisciplinary firm of architects, structural engineers, and materials scientists that specializes in the investigation, analysis, testing, and design of repairs for historic and contemporary structures. WJE focuses on delivering practical, innovative, and technically sound solutions across all areas of construction technology. Since the firm’s founding more than fifty years ago, WJE specialists bring the collective experience gained from conducting more than seventy-five thousand investigations worldwide to every construction challenge. WJE combines state-of-the-art laboratory and testing facilities, nationwide offices, and knowledge sharing systems to provide solutions for the built world.
