- Laboratory
- Forensics
- Facade assessment
- Roofing and waterproofing
- Failure and disaster response
- Historic preservation
- Repair and rehabilitation
- Peer review and enclosure commissioning
- Reserve studies

WIE ENGINEERS ARCHITECTS MATERIALS SCIENTISTS

OUR APPROACH

Structures in the growing centers of the Carolinas are just as diverse as the population's cultural and economic base. As materials, technologies, and structures change, our fundamental philosophy remains the same: developing better solutions based on an accurate diagnosis of each structure's unique problem. We strive to create partnerships and solutions that meet and exceed the needs and expectations of our clients.

OUR PEOPLE

With a local team of technical staff in Raleigh, collaborative offices in Washington, D.C. and Atlanta, and over 800 employees worldwide, WJE has the resources to respond to virtually any problem in all aspects of construction technology. Our team applies the experience, technical capabilities, and knowledge gained from thousands of projects to every new challenge.

OUR RESOURCES

Our Janney Technical Center laboratory and testing facility is one of the nation's largest privately owned construction-based testing laboratories, enabling WJE to provide reliable answers to questions about construction systems, components, and materials. No firm is more qualified to break new ground in finding practical, innovative, and technically sound solutions.
