EXPERIENCE

Wade Garlin specializes in the evaluation and repair design of building envelope systems, including below-grade waterproofing, wall cladding, windows, and roofing systems. He has performed hundreds of water tests on historic buildings and new and existing construction for such clients as architects, condominium associations, contractors, insurance companies, private owners, and property managers.

Mr. Garlin also has broad-based experience in repair and rehabilitation projects. He routinely performs field inspections to observe and document distress conditions in buildings, designs repairs, develops construction documents, and provides construction observation services. Mr. Garlin has also provided peer review services for numerous projects. His projects have involved both existing buildings and new construction. Mr. Garlin currently serves as the Architectural Review Committee chair for Hawaii Loa Ridge, Kapalua Bay Villas, and Nauru Tower.
