EXPERIENCE

Since joining WJE in 2007, Andrew Lobbestael has been involved with numerous projects related to both structural engineering and architecture. His typical responsibilities have included the investigation and analysis of existing and damaged structures, nondestructive evaluation of concrete, development of repair and rehabilitation documents, and construction observations. He has performed a variety of structural analyses on steel, concrete, masonry, and wood.

Mr. Lobbestael has investigated several structural failures and has performed numerous water infiltration investigations. The water infiltration investigations have solved long-term water infiltration issues. Additionally, he has performed construction vibration monitoring and performed vibration-related damage assessments. Prior to joining WJE, Mr. Lobbestael performed construction materials testing.
