EXPERIENCE

Since joining WJE in 2017, Gloria Moy has been involved with numerous projects that involve building enclosure evaluations and investigations of distressed and deteriorated conditions in existing buildings. These projects include glass, masonry, and concrete facades and single-ply, built-up, and liquid-applied roofing systems in both contemporary and historic buildings. Ms. Moy's responsibilities have included inspecting existing buildings (including water testing), writing investigative reports, designing repairs, developing construction documents, and performing construction observation.

Prior to joining WJE, Ms. Moy was part of the preservation efforts of the E. Arthur Davenport House, designed by Frank Lloyd Wright. Ms. Moy also has approximately two years of experience in new construction design.

REPRESENTATIVE PROJECTS

Facade Assessment

- 150 North Michigan Avenue - Chicago, IL: Curtain wall and sloped glazing inspection
- 55 East Pearson Street - Chicago, IL: Cast-in-place concrete with aluminum window facade inspection and repair
