EXPERIENCE

Gregory Reidenbach primarily works in the investigation and repair of exterior building envelopes. He has experience in all major aspects of projects, including initial investigation and field testing, repair design, construction document preparation, and construction contract administration.

Mr. Reidenbach evaluates and repairs exterior wall systems such as precast concrete, portland cement plaster (stucco), clay masonry, concrete masonry, rain screen, and traditional wood siding systems. In addition, he works with the design, evaluation, and repair of below-grade waterproofing, plaza waterproofing, and roofing systems.

Mr. Reidenbach also provides design consulting and peer review services to architects and developers for building envelope and waterproofing systems. He provides design consulting and peer review services to architects and developers for building envelope and waterproofing systems and participates in historic renovation and rehabilitation projects.
