#### EXPERIENCE

Matthew Salzer joined the Washington, D.C. branch of WJE in 2017 with a primary focus in building enclosure consulting and evaluation of building fenestrations. He has gained extensive experience on a broad range of projects relating to construction observation, field quality assurance, facade failure investigation, rehabilitation, condition assessment, and evaluation of new and existing structures. Mr. Salzer has also been actively engaged in field testing for air and water penetration resistance, both in a forensic capacity and in the context of new construction, using ASTM and AAMA voluntary guide specifications and test standards

Prior to joining WJE, Mr. Salzer worked as a project manager for a commercial glazing company where he was heavily involved in the oversight of project deliverables and schedule. During his time there, he gained extensive hands on experience and familiarity with a variety of fenestration systems and metal wall panel systems.

#### REPRESENTATIVE PROJECTS

##### Building Enclosure Commissioning

- Smithsonian Institution, Dulles Collection Center - Chantilly, VA: Submittal review, mockup evaluation, functional performance testing program, and construction period services (consulting, inspections, and testing)

##### Building Enclosure Consulting
