

James C. Strong | Associate Principal

EDUCATION

- Michigan State University
 - Bachelor of Arts, Communications, 1970

PRACTICE AREAS

- Failure/Damage Investigations
- Design
- Litigation Consulting
- Roofing and Waterproofing
- EIFS, Stucco, Plaster
- Masonry
- Coatings and Sealants

PROFESSIONAL AFFILIATIONS

- ASTM International, Fellow, past chair of subcommittees
- International Concrete Repair Institute (ICRI), past chapter board member
- Westcon, past president

TECHNICAL COMMITTEES

- ASTM C24 - Building Seals and Sealants
- ASTM D08 - Roofing and Waterproofing

EXPERIENCE

James Strong's career over more than forty years has focused on avoiding, investigating, and solving water intrusion problems. At WJE, he contributes the knowledge gained through failure investigations and experience with the development of construction standards. On his own projects and as part of a team he performs field and laboratory investigations, conducts observations, selects repair/replacement materials, develops details, and prepares reports. Prior to joining WJE in 2000, Mr. Strong was a principal at Testing Engineers, Inc. In his nineteen years there, he managed the roofing inspection and laboratory departments and provided building enclosure consulting alongside his companywide management responsibilities.

REPRESENTATIVE PROJECTS

Failure/Damage Investigations

- County and School District Buildings - Aransas County, TX: Evaluation of hurricane wind damage and designs of repairs and reroofing
- Ernest N. Morial Convention Center - New Orleans, LA: Investigation of hurricane wind damage to roofing and repair design

Design

- Grace Cathedral - San Francisco, CA: Owner's Representative for design-build reroofing and architectural concrete restoration
- Philadelphia Museum of Art - PA: Peer review of waterproofing design for new subgrade construction

Litigation Consulting

- Horizon and MontBleu Casino Resort Hotels - South Lake Tahoe, NV: Investigation of adequacy of lessee's maintenance of buildings' exterior enclosure and testimony at trial
- Warehouse - Metairie, LA: Investigation of hurricane wind damage and testimony at trial

Roofing and Waterproofing

- Marin County Civic Center - San Rafael, CA: Field and laboratory testing to support selection of replacement for iconic blue roofing at Frank Lloyd Wright-designed building
- Old Santa Fe Trail Building - Santa Fe, NM: Construction phase services for reroofing at historic adobe

- Andersen Air Force Base Exchange - Guam: Investigation of splitting of liquid-applied membrane on concrete roof deck and testimony at mediation
- University of California, San Francisco Research Building: Investigation of failure of new flooring
- One Market Plaza - San Francisco, CA: Design of waterproofing for renovation of plazas
- Wawona Hotel - Yosemite National Park, CA: Waterproofing specification for bathroom renovation; investigation of wood roofing and design for reroofing project
- Shopping Center - Los Angeles, CA: Investigation of leakage at below grade and plaza waterproofing, repair design, and litigation support

EIFS, Stucco, Plaster

- Alameda County Medical Center - Oakland, CA: Investigation of leakage in new construction, design of repairs for stucco cladding, and litigation support
- EPA building - San Francisco, CA: Design of repairs and construction phase services for EIFS, roofing, deck waterproofing, and interior green-wall

Masonry

- Blimp Hangars - Santa Clara County, CA: Investigation of rising damp in brick masonry and repair design

Coatings and Sealants

- Cathedral of Christ the Light - Oakland, CA: Investigation of leakage at concrete exterior walls, repair design, and construction phase services
