#### EXPERIENCE

Jean Wu has extensive experience in exterior envelope consulting services of new construction projects focusing on interface detailing, water penetration, air infiltration, and condensation issues related to the exterior facade elements such as air barriers, windows, curtain walls, masonry veneer wall system, metal panels, EIFS, precast concrete panels, and roofing systems.

Ms. Wu has also been involved in numerous mid-rise and high-rise building facade assessment and investigation projects involving brick masonry walls, EIFS, reinforced concrete structures, terra cotta building facades, windows, curtain walls, adhered masonry veneer, insulated metal panels, and high-rise thin-stone cladding veneer construction.

These investigative projects frequently involve field water testing of exterior building components and followed by repair design and construction document preparation.

#### REPRESENTATIVE PROJECTS

##### Exterior Envelope Consulting

- University of Pittsburgh, Fifth Avenue Freshman Housing - PA: Exterior envelope design review
- Washington University in St. Louis, Olin Business School Expansion - MO: Exterior envelope design review
- Boeing Building 245 Expansion - St. Louis, MO: Exterior envelope design review and construction observation services
- Southeast Louisiana Veterans Health Care System, Replacement Medical Center - New Orleans, LA: Exterior envelope design review, quality control testing, and construction observation services
- Mount Carmel East Hospital Expansion - Columbus, OH: Exterior envelope design review, onsite mockup review, and construction observation services
- Krause Gateway Center - Des Moines, IA: Exterior envelope design review and construction observation services
- Northwestern University, 560 Lincoln St. Student Housing - Evanston, IL: Exterior envelope design review, onsite mock-up review, and construction observation services
- Mercy Hospital Northwest Arkansas - Rogers, AR: Exterior envelope design review and construction observation services

- Omaha VA Ambulatory Care Center - NE: Exterior envelope design review and construction observation services
- National Bio and Agro-Defense Facility (NBAF) - Manhattan, KS: Exterior envelope design review, on-site mockup review, quality control testing, and construction observation
- Kansas City Airport New Terminal - MO: Exterior envelope design review and construction observation services

##### Facade Assessment

- 980 North Michigan (One Magnificent Mile) Building - Chicago, IL: Investigation and documentation of thin granite veneer system
- OSF Healthcare Saint Francis Medical Center - Peoria, IL: Facade assessment and repair design of multiple hospital buildings

##### Leakage Investigation

- U.S. Environmental Protection Agency Research Facilities - Research Triangle Park, NC: Leakage investigation, field water testing, and repair design
- William P. Hobby Airport - Houston, TX: Leakage investigation, field water testing, and repair design
- OSF Healthcare St. Joseph Medical Center - Bloomington, IL: Leakage investigation of multiple buildings, field water testing, repair design, and construction period services
- Northwestern University, Arthur Rubloff Building - Chicago, IL: Leakage investigation, field water testing, repair design, and construction period services
