EXPERIENCE

Since joining WJE in 2008, Steve Fedorchak primarily focuses on initial investigations, field testing, repair design, preparation of construction documentation, and the restoration of buildings and structures. In addition, he has performed field investigation on EIFS, portland cement plaster (stucco), reinforced concrete, clay masonry, concrete masonry, water leakage, roofing systems, and waterproofing materials.

Mr. Fedorchak has managed and participated on a variety of projects, including construction defect investigation, building envelope assessments, and historic preservation design. He is a unit CAD manager with responsibilities ranging from maintaining company standards to performing quality control on product work flow.

Prior to joining WJE, Mr. Fedorchak was project and CAD manager at Thomas Anderson & Co., where he primarily focused on failure investigation, litigation consulting, preparation of construction documents, and construction administration.
