EXPERIENCE

Dale Strutt has broad-based experience in the areas of roofing, waterproofing, and exterior wall systems. He evaluates the condition of these assemblies, locates sources of moisture infiltration, and investigates causes of roofing, waterproofing, and exterior wall failures. He also develops drawings and specifications for repair, replacement, and new construction projects and provides related construction observation services. Mr. Strutt performs moisture infiltration investigations of various building envelope types, including masonry, stucco, EIFS, metal panel, and siding materials. Additionally, his work involves the evaluation of window and door systems and their integration into the building envelope.

Prior to joining WJE, Mr. Strutt worked for ten years as a journeyman for a commercial roofing company and for two years as a journeyman roofer for the University of California, Davis, and the University of Colorado Boulder.
